**Construction:**

The Berry Plumbing & Equipment **Electric Paw Harvester / Foot Pad Scrubber Combo** is constructed entirely of stainless steel and UHMW for durability and easy cleanup.

**Operation:**

**The Foot Pad Scrubber Combo** matches the speed of your Overhead Conveyor. Installed at the end of the Kill Line, the **Paw Harvester/ Foot Pad Scrubber Combo** features brushes that gently clean the foot and remove small ammonia burns, cuticle, and even fecal matter while perfectly positioning it in the shackle for a consistently straight cut at whatever length you require. The **Paw Harvester** blade then cleanly cuts and separates the paw from the knuckle, allowing for easy processing of any size paws.

**Yield:**

The Berry **Foot Pad Scrubber Combo** demonstrated a *significant increase* in yield when compared in tests to our competitors.

**Maintenance:**

With proper operation, regular cleaning and daily maintenance, the only other maintenance the **Paw Harvester / Foot Pad Scrubber Combo** requires is an occasional sharpening of the Paw Harvester blade.

The specifications as stated herein are the most current at the time of publication. However, consistent with our standard of continual product development, we reserve the right to change the design without notice or obligation to modify any equipment previously sold or delivered. 05/19/2022
