GEARBOX:	5:1

Construction:

The Berry Plumbing & Equipment **Model B-PT-1** is constructed entirely of stainless steel for durability and easy cleanup.

Operation:

After your Berry Paw Harvester cuts the paws, convey them to the **Model B-PT-1 Paw Inspection Table** where any excess yellow and ammonia burns can be removed by simply guiding the paw over the specially designed peeler rollers which pull the waste into the hopper underneath the table. Waste is discharged from the hopper from a drain hole at the bottom.

Maintenance:

Berry Plumbing & Equipment Company designers and technicians have taken great care in assuring that the **Model B-PT-1** is manufactured with smooth rounded surfaces and easily removable covers to make thorough clean up easy for cleaning personnel. Maintenance required is cleaning, Peeler rollers should be changed regularly to assure maximum yield and efficiency.
